## **Heart of the Brazos Oral & Facial Surgery host Chamber Business after Hours** *Business community visits dental and medical practice*

**Woodway, TX** – During the two years the Heart of the Brazos Oral & Facial Surgery opened its doors they have been awaiting the opportunity to reveal the advanced medical technology and dedicated staff to the Waco business community. On Tuesday, August 4<sup>th</sup>, 2009 HBOFS hosted an extravagant Chamber of Commerce Business after Hours.

The HBOFS staff was on hand for touring of the dental and medical practice which included viewing of the three state of the art surgical bays and three private consultation rooms. Those in attendance were also able to view the advanced technology present such as the E-Woo 3-D Cone Beam CT Scan the practice had installed earlier this year.

Much of the advanced technology was incorporated from the visions and prior medical experiences Dr. Charles Clark and spouse, Heidi Clark, RN, MSN, CCRN gained during their military service prior to building the practice in Woodway, Texas.

Dr. Scott Warren provides the unique experience of being the only dual degree Oral & Maxillofacial Surgeon and Medical Doctor in Waco.

Dr. Clark and Dr. Warren's vision in providing advanced medicine to their patients is evident with the technology and staff they have incorporated into HBOFS. The practice provides Central Texans advanced medical technology and a clinical staff comprised entirely of Registered Nurses certified in Advance Cardiac Life Support and Pediatric Cardiac Life Support. The Administrative staff offers combined experience in insurance and customer service in a compassionate environment.

An estimated 250 guests from the business community attended the Business after Hours which was catered by Blanek Custom Catering by Big Daddy's.
