HEART OF THE BRAZOS ORAL & FACIAL SURGERY
HOST CONTINUING EDUCATION SEMINAR
[3 – D CONE BEAM CAT SCAN]

HBOFS is excited to host a seminar on the newest cutting edge technology in the field of oral and maxillofacial surgery, 3 dimensional cone beam computerized axial tomography [CAT SCAN].

Heart of the Brazos Oral & Facial Surgery will be a handful of dental and medical practices in the United States to install the South Korean E-Woo advanced technology in their Central Texas practice.

In order to introduce and educate the medical community on this new technology, Dr. Clark & Dr. Warren will host a seminar with special guest, **Dr. Jeff Brooks**, E-Woo Medical Director of Little Rock, Arkansas on February, 16th 2009 at Rosati's Restaurant in Hewitt, Texas a 6:00 PM.

The 3-D Cone Beam CT Scan is cutting edge technology and will provide the medical staff at Heart of the Brazos Oral & Facial Surgery more accurate predictable diagnosis for surgical outcomes in facial trauma reconstruction, wisdom teeth extractions and dental implants.
